Research Experience

Research on the Construction of a Data-Mechanism Integrated Virtual Model for Fire Evolution

Jul 2024 – Nov 2024 | Wuhan and Shanghai, China

- Prepare a project proposal that uses Unity 3D to model selected ship compartments, employs PyroSim to analyze fire evolution, and proposes a ship fire evolution model.
- Applied physics-informed neural networks (PINNs) to model ship fire evolution and support early-warning and risk assessment for compartment fire scenarios.
